

	List of the artifacts/features for data_augmentation					
	Sl. No.	Artifact introduced	Implementaion: script used afni command	range	notes/ additional info	
	1	rotation	transformation.tcsh 3dAllineate	plus / minus 30 degrees		
	2	shear	transformation.tcsh 3dAllineate	plus/minus 0.1111		
	3	scaling	transformation.tcsh 3dAllineate	plus/minus 20%of grid size		
	4	shift	transformation.tcsh 3dAllineate	plus/minus 32% of grid size		
	5	add noise	do_add_noise.tcsh 3dcalc	multiplicative noise 10%, 20%, 30%		
	6	gain inhomogeneity	do_gain_inhomogeneity.tcsh 3dcalc	gain inhomogeneity within a window(0.4,1.2)		
	7	motion artifact	NA	NA		
	8	gibbs artifact				
	9	zipper noise	do_make_zipper_noise.tcsh	Depends on the mean value of the intensity in the dataset. Ideally use 70th percentile for brighter lines of zipper noise	I would like to add another consecutive line of zipper noise. want the interleaving between ones and zeroes to be lesser
